Resource DVD
Included!

A series for primary children learning to write letters with the characters Bartleby and Gom

Write Right! Learning to Print is a fun and engaging instructional video series that utilizes tried and true strategies for primary students learning to print letters. With a generous dose of music, rhyme, and humor, students make clear connections to their early reading programs by using of common word models. The modular, segmented design of the series allows for the introduction of letters in an interactive, flexible way so it is self-standing or can be used as a visual supplement to other handwriting programs with different letter sequencing. Teachers may use the series with a whole class using interactive white board technology for letter formations or with student groups or individuals using unique segments for differentiated instruction or reinforcement.

Write Right! Learning to Print has two charming characters: Bartleby, the wild and crazy pencil, and his glum chum, Gom, the eraser. Follow Bartleby's encounters in his community through illustrated letters that he writes to Gom— which thoughtfully transition to the practice of letter formation. A well-proven strategy for learners is that children are encouraged to trace the shape that is being introduced with their finger in the air or on their desktops while students watch Bartleby form the letters. Then, they practice tracing then copying the letters, and finally, students are encouraged to self-critique. **Write Right! Learning to Print** uses high quality animation to ensure that the **Write Right!** series will look fresh for years to come in order to help children develop good habits to write right!

Write Right! Learning to Print a series of sixteen 5-10 minute programs for students in Pre-K-Grade 1 with a Bonus Resource DVD with teacher guide, wall cards, desk strips, & music with lyrics!
